

# One textile. Two treatments. Three functions.

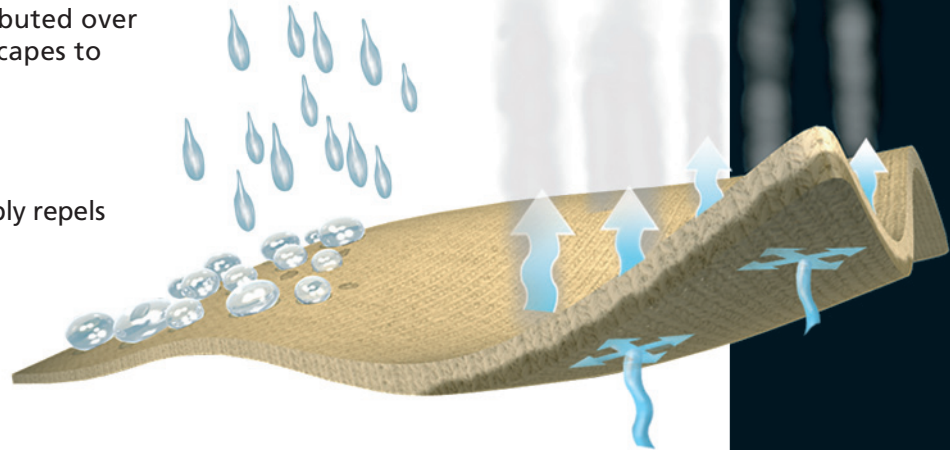

3XDRY® treatments combine two technologies into one textile: on the outside the textile is finished with a water-repellent function, whereas on the fabric's inside it absorbs perspiration. The treatment does not affect the appearance, hand or the air permeability features of the fabric.

**3XDRY®**  
a schoeller® technology

## Dry on the inside:

Moisture resulting from perspiration is quickly absorbed from the inner side of the textile with 3XDRY® treatment. Perspiration is distributed over a large surface area and escapes to the outside.

The outside of the textile is water, dirt and stain repellent.

## Dry on the outside:

The 3XDRY® treatment reliably repels moisture.

## Dry in a flash:

The distribution of the moisture over a large surface area ensures rapid evaporation. Therefore, textiles with 3XDRY® dry noticeably faster than those without 3XDRY®.

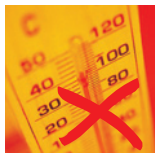

On the inside any moisture is quickly absorbed and distributed over a large surface area, accelerating the evaporation process.

the feelgood technology

## Advantages:

- Minimizes perspiration marks

- Stimulates a cooling effect

- Repels water and stains

- Advanced Moisture Management System
- Enables the skin to breathe
- Ensures wear-comfort you can see and feel
- Is applicable on all textiles (cotton, synthetics, etc.)
- Is a "bluesign®-approved-process"

## Applications:

3XDRY® is ideal for outdoor, sportswear, women's fashion, men's fashion, career apparel, workwear.
